

MOVING WATER SILT & TURBIDITY CURTAINS TRITON Type 2 Permeable Curtains

SolHuTec's Type 2 Permeable Curtain is designed for control in locations that require movement through the curtain. Rather than a full length impermeable skirts, these curtains feature a bottom skirt with built in 6 oz. monofilament geotextile panels. This allows water to flow through the curtain, while still keeping silt and sediment contained within your site.

TURBIDITY CURTAIN FEATURES

- 22 oz. PVC w/ 6 oz. Monofilament Panels
- 5/16" Bottom Chain
- 6" or 8" Flotation Device
- 5/16" Single Tension Cable
- Universal Bulk Connectors w/ Grommets
- Section Lengths: 50' and 100'
- Depths: 3' to 100', Standard 5'

CURTAIN USES & APPLICATIONS

- Pond & Lake Silt Containment
- Dock and Bridge Repair
- Dredging Projects
- River Turbidity Control
- DOT Projects
- Shoreline Silt Control

TYPE 2 PERMEABLE ADVANTAGES

- Filters & Contains Silt to a Location
- Allows Water to Pass through the Barrier
- Equipped for Moving Water Locations
- Multiple Sizes & Depths
- Robust Fabrics & Materials
